

DOME DOOR - COMPLETE EVENT RECORD

Copied from the manufacturer's servers. Every event the controller sent, with nothing filtered. Site users cannot alter this record.

SEQ	TIMESTAMP	EVENT	SOURCE
#4468	06 JAN 18:00:00	SELF-TEST	CONTROLLER · OK
#4469	06 JAN 18:00:01	LATCH ARMED	CONTROLLER
#4470	06 JAN 21:58:10	OPEN	KEYPAD · CODE H (HALE)
#4471	06 JAN 21:58:31	CLOSED	DOOR SENSOR
#4472	07 JAN 01:24:33	OPEN	KEYPAD · CODE L (LINDQVIST)
#4473	07 JAN 01:24:50	CLOSED	DOOR SENSOR
#4474	07 JAN 01:52:18	OPENED FROM INSIDE	HANDLE SENSOR
#4475	07 JAN 01:52:26	CLOSED	DOOR SENSOR
#4476	07 JAN 07:08:12	OPEN, DOOR MOVED	KEYPAD · CODE B (BRACKLEY)
#4477	07 JAN 07:08:44	CLOSED	DOOR SENSOR
#4478	07 JAN 07:31:05	OPEN	DOOR SENSOR · NO LATCH

KeyLine note. "DOOR MOVED" means the door sensor saw the door swing open after the keypad unlocked it. A door held by the hand bolt cannot move. Six events, #4472 to #4477, are missing from the site console print dated 07 JAN 09:40 (user T.BRACKLEY, filtered view). Filters are set by the site administrator.

WORKSTATION SESSION LOG

TIME	EVENT
23:35:12	User I.LINDQVIST signs in.
23:35 - 01:23	Keyboard and mouse use, steady.
01:23:40	Last keyboard or mouse input.
01:38:40	Screen locked automatically after 15 minutes with no input.
02:06:30	Screen unlocked. Password: I.LINDQVIST.
02:06 - 03:01	Browser: web searches, see below.
03:01:55	User signs out.

TIME	SEARCHES TYPED
02:11	"can blood be detected on brass after cleaning"
02:19	"keyline k-40 delete event"

The imaging sequence finished at 01:20 (D-2). Nobody used this workstation for 43 minutes after 01:23.

THE COUNTERWEIGHT

Brass, 2.1 kg. The grip end is 34 mm across, knurled in a fine criss-cross pattern.

- The surface has been wiped with a solvent. Visible blood: none.
- Inside the knurling, a chemical test finds **human blood. DNA: Edmund HALE.**
- Two scalp hairs trapped in the knurling. **Microscopy: consistent with Edmund HALE.**
- No identifiable fingerprints. The grip was wiped.

Comparison. The 34 mm knurled grip matches the size and pattern of the depressed fracture on the crown of the head (B-1, injury 2).

CURRENT ACCOUNT

Timestamp	Credit	Reference
07 JAN 06:41	\$4,000.00 from I. LINDQVIST	"boiler"

No other credit from Dr Lindqvist in the account's history. The observatory's boiler was serviced in October and is paid for by the university.

UNSENT DRAFT, LAST SAVED 01:16

To: the Editor, Monthly Notices **Re:** Lindqvist et al., "A new long-period comet, C/2025-K4"

"I asked to see the raw frames from the discovery night. The timestamps in the submitted images do not match this observatory's mount log: on the night claimed, the telescope was pointed at a different part of the sky. I believe the discovery images were assembled from another survey's public data."

"I will put this to Dr Lindqvist myself tonight, and send this letter in the morning whatever he says."

Document created 04 JAN. Last saved 07 JAN 01:16:22. Never sent.

BUS RECORDS

SECOND OPINION - HEAD INJURIES

Injury 2, on the crown, is a **blow from above with a heavy object with a round, patterned face**. It was struck first, while he was standing or sitting. It would have stunned him at once.

Injury 1, at the back of the head, is consistent with falling backwards onto the floor plate after the first blow.

A fall cannot cause both. This was not an accident.

WEATHER & SKY

A clear, still, cold night. The best seeing of the winter. Nothing here bears on how he died.

CASE REVIEW UNIT

RECONSIDER - ACCUSATION RETURNED

R/ALONE

OPEN ONLY IF

ACCUSED

YOU HAVE NAMED ONE OF THEM

Ivo Lindqvist did not tear a bolt keeper off a door frame at ten past seven in the morning. He was in his lodgings by then.

WHAT YOUR THEORY HAS TO SURVIVE

Somebody turned a murder into an accident in a locked room. Ask who said the door was bolted, who forced it, **which side of the frame is splintered**, and who printed the door log the first officer relied on.

No score is awarded for this accusation. -10 points. Go back to the file.

RECONSIDER · ONE NAME

ACCUSATION RETURNED

YOUR ACCUSATION OF THOMAS BRACKLEY DOES NOT HOLD

Not as the killer. He lied to you, and you are right to want him in this file.

WHAT YOUR THEORY HAS TO SURVIVE

Your theory needs him in the dome when Edmund Hale died. **Read D-3.** The main entrance is the only way in from outside, and an independent company keeps that log. When did Thomas Brackley first come into the building? Then ask who was already there.

No score is awarded for this accusation. -10 points. Go back to the file.

YOUR ACCUSATION OF DR MIRIAM OKAFOR DOES NOT HOLD

She gains a job. That is a motive, and only a motive.

WHAT YOUR THEORY HAS TO SURVIVE

She was in Geneva, and no card of hers opened any door of the building that night (D-3). She also told you something useful: Hale had found "a problem in somebody's data". Whose?

No score is awarded for this accusation. -10 points. Go back to the file.

YOUR ACCUSATION OF ELLEN HALE DOES NOT HOLD

An insurance policy is not an opportunity.

WHAT YOUR THEORY HAS TO SURVIVE

She is 19 km away and her card never touched the building (D-3). Her husband was alive and using the telescope at 01:31, more than an hour after she rang him (D-2). Who was in the building at 01:31?

No score is awarded for this accusation. -10 points. Go back to the file.

YOUR ACCUSATION OF KASIA NOWAK DOES NOT HOLD

She was angry with him, and she said so to anyone who would listen.

WHAT YOUR THEORY HAS TO SURVIVE

She left by the main entrance at 23:41 (D-3), and nothing in the building opens from outside without a card. The professor was alive at 01:31 (D-2). Then read what she overheard at about ten o'clock, and who it was said to.

No score is awarded for this accusation. -10 points. Go back to the file.

Case Resolution & Final Summary

Do not open this until your Case Resolution Sheet is complete and your final accusation is written down.

READING IT

Read the following pages aloud, in order, and check your sheet against each step. Score afterwards, not during.

ALDENMOOR MPS · CASE REVIEW UNIT

THE ASHCOMBE DOME

STEP 1 · NOT A FALL

A fall strikes the head once. Edmund Hale had two head injuries, on opposite sides of his skull.

The one on the crown is a 34 mm circle with a criss-cross pattern. Nothing on the ladder or the rail has that surface (E-1.3). The brass counterweight on the platform rack does: a 34 mm knurled grip. It was the only clean one of the four, and his blood and hair were still in the knurling.

Evidence: B-1 (two injuries, one patterned), E-1.2 and E-1.3, and SLIP 03 or SLIP 09.

STEP 2 · WHEN

He was alive at 01:37:12, when he stopped the telescope with the hand paddle in the dome. Nobody touched the telescope again; it tracked on until it hit the horizon at 03:52.

The killer left the dome at 01:52:18. **Edmund Hale died between 01:37 and 01:52.**

Evidence: D-2 (hand paddle 01:31 - 01:37, then nothing), SLIP 01 (exit 01:52).

STEP 3 · THERE WAS NO LOCKED ROOM

The door was never forced from outside. The splinters are on the inside of the frame, and the pry marks are on the inside edge of the door.

At 07:08:12 Thomas Brackley's code opened the dome door, and it swung open: a bolted door cannot move. He went in, closed the door, threw the hand bolt, levered the keeper off the frame from inside, and walked out through a door that now looked forced. Then he rang 999.

Evidence: E-1.1 (damage on the inside), SLIP 01 (#4476 OPEN, DOOR MOVED), against C-1.

STEP 4 · THE FORGED LOG

D-1 is a filtered printout made by the man who forced the door.

It jumps from event #4471 to #4478, and its own footer says the period held 11 events while it shows five. The six it leaves out are exactly the six that matter: Lindqvist in at 01:24, Lindqvist out at 01:52, and Brackley's own code at 07:08. With them gone, the log said what the first officer believed: nobody went in after Hale.

Evidence: D-1 (sequence gap, count mismatch, "FILTERED", printed by T.BRACKLEY), **SLIP 01** (the full record).

STEP 5 · THE KILLER

Ivo Lindqvist said he never went near the dome.

His code opened the dome door at 01:24:33. His workstation had no input from 01:23:40 until he unlocked it at 02:06:30, so "I watched every frame come in" is false: the sequence had finished at 01:20. He left the dome at 01:52:18. At 02:11 he searched for how to find blood on cleaned brass, and at 02:19 for how to delete a door event.

Evidence: **SLIP 01** (#4472, #4474), **SLIP 02**, **D-2** (sequence complete 01:20), against **C-2**.

STEP 6 · THE COVER-UP

Thomas Brackley did not kill anyone. He was not in the building until 07:02 (D-3). He made the murder into an accident.

Lindqvist rang him at 03:18, thirteen minutes after leaving. At 06:41 \$4,000 arrived in his account from Lindqvist, marked "boiler". Twenty-seven minutes later he staged the locked door, and that morning he printed the police a door log with the night taken out of it. He told the police nobody rang him.

Evidence: E-1.1, **SLIP 01**, **D-1**, **SLIP 04**, against **C-1**.

STEP 7 · THE CLEARED

Dr Miriam Okafor was in Geneva; no card of hers was used (D-3, **SLIP 06**). **Ellen Hale** never entered the building and her car never left her drive (D-3, **SLIP 07**). **Kasia Nowak** left at 23:41 and was on the last bus (D-3, **SLIP 08**). Nothing in the building opens from outside without a card, and Hale was alive at 01:31.

STEP 8 · WHY

Edmund Hale had found out that Lindqvist's comet was not his. The discovery images had been assembled from another survey's data, and the observatory's own mount log proved the telescope had been pointed elsewhere that night. At 01:16 Hale saved a letter to the journal. He meant to put it to Lindqvist "tonight" and send it "in the morning whatever he says".

Evidence: SLIP 05, with C-3 ("a problem in somebody's data"), C-4 and C-5 ("Tonight, Ivo").

MURDER

IVO LINDQVISTwith the cover-up by **THOMAS BRACKLEY**

WHAT HAPPENED

The imaging finished at 01:20 and Lindqvist went up. Hale was at the paddle, nudging the telescope east to show him, from the mount log, where it had really been pointing. The argument lasted a few minutes. Lindqvist picked a counterweight off the rack and struck him once from above. Hale fell backwards off the platform edge onto the floor plate.

Lindqvist wiped the weight, put it back, and walked out at 01:52, leaving the door shut but unbolted. He sat in the control room for an hour, searching for how to undo what he had done, then drove away and rang the one man who could change the door log.

Brackley's price was \$4,000. He bolted a dead man in, broke the door open from the wrong side, and printed a log that ended at 21:58. The first officer saw a locked room and a ladder, and did the rest himself.

The lock told the truth. It just told it to two places, and only one of them could be edited.

SCORE THE FILE, NOT THE GUESS

Award points only for what was **written on the Case Resolution Sheet before the final accusation.**
